Vison and values

This school is committed to safeguarding and promoting the wellbeing of children and young people and expects all staff and volunteers to share this commitment.

This policy has due regard to the following ethos:

At Meanwood C of E Primary School we will continuously strive to ensure that everyone in our school is treated with respect and dignity. Each person in our school will be given fair and equal opportunities to develop their full potential with positive regard to gender, ethnicity, cultural and religious background, faith, sexuality or disability. The school will provide an inclusive curriculum, which will meet the needs of all its pupils including those with disabilities, special educational needs, from all cultural backgrounds and faiths and pupils with English as an additional language.

Vision

Open Hearts.

Open Minds

Open Arms.

Through the teachings of Jesus Christ, we exist to enrich the lives of our children emotionally, physically, spiritually and academically. Our commitment is to be a hospitable community with open hearts, open minds and open arms, where every person is valued, nurtured and empowered. Enabling everyone to flourish and excel in the knowledge of being loved by God and created in his image.

To do this, we need open hearts, open minds and open arms.

Values

COOPERATE: Share and learn together.

ACHIEVE: Try your best, always.

REFLECT: Value everyone and everything.

EMPATHISE: Stand in someone else's shoes.

Our vision and values are theologically underpinned underpinned by the Bible verse- John 15:12- "My commandment is this: love one another, just as I love you."

AIMS AND OBJECTIVES

Although we recognise that this cannot be guaranteed, Meanwood CE, aims to be a Nut-Free school. This policy serves to set out all measures to reduce the risk to those children and adults who may suffer an anaphylactic reaction if exposed to nuts to which they are sensitive. The school aims to protect children who have allergies to nuts yet also help them, as they grow up, to take responsibility as to what foods they can eat and to be aware of where they may be put at risk. We do not allow nuts or nut products in school lunch boxes.

Our “Nut-Free Policy” means that the following items should not be brought into school:

- Packs of nuts
- Peanut butter sandwiches
- Fruit and cereal bars that contain nuts
- Chocolate bars or sweets that contain nuts
- Sesame seed rolls (children allergic to nuts may also have a severe reaction to sesame)
- Cakes made with nuts
- Chocolate spread such as Nutella.

We have a policy to not use nuts in any of our food prepared on site at our school. Our suppliers provide us with nut-free products. However, we cannot guarantee freedom from nut traces. We only allow jellied sweets or vegan/vegetarian alternatives to be given out as birthday treats.

Definition

Anaphylaxis (also known as anaphylactic shock) is an allergic condition that can be severe and potentially fatal. Anaphylaxis is your body’s immune system reacting badly to a substance (an allergen), such as food, which it wrongly perceives as a threat. The whole body can be affected, usually within minutes of contact with an allergen, although sometimes the reaction can happen hours later.

Staff Procedures to follow

Staff and volunteers must ensure they do not bring in or consume nut products in school and ensure they follow good hand washing practice.

Caution must be taken at certain times of year such as Easter and Christmas. If Staff distribute confectionary, care must be taken to ensure that no nuts are included in the product. Fruit sweets such as Haribo are a better alternative. Particular products that are a cause for concern are: - Celebrations – Roses – Heroes – Quality Street.

All product packaging must be checked for warnings directed at nut allergy sufferers and if the following or similar are displayed, the product must not be used in school. Packaging must be checked for:

- Not suitable for nut allergy sufferers;
- This product contains nuts;
- This product may contain traces nuts;
- Indicating this is unsuitable for school consumption.

Epi Pen trained staff are named First Aiders. Please check the school office and the First aid lists located around school for list of the staff who are trained.

Parents and carers procedures to follow.

Parents and carers must notify staff of any known or suspected allergy to nuts and provide all medical and necessary information. This will be added to the child's health care plan and if necessary a meeting organised with the school nurse. Homemade snacks or party food contributions must have a label detailing all ingredients present and the kitchen environment where the food was prepared must be nut free. If you are unsure about a selection please speak to a staff member before bringing the food item into school.

The school requests that parents and carers observe the nut-free policy and therefore do not include nuts, or any traces of nuts, in packed lunches.

Children procedures to follow

All children are regularly reminded about the good hygiene practice of washing hands before and after eating which helps to reduce the risk of secondary contamination. Likewise children are reminded and carefully supervised to minimise the act of food sharing with their friends.

Health Care Plans and Emergency response

We have individual Healthcare plans for children with allergies and Medical Lists are displayed in classrooms highlighting Healthcare plans in place, triggers, medication (Medication will be stored, administered and documented in accordance with our Supporting Children with Medical Needs Policy).

Symptoms

The symptoms of anaphylaxis usually start between three and sixty minutes after contact with the allergen. Less commonly they can occur a few hours or even days after contact. An anaphylactic reaction may lead to feeling unwell or dizzy or may cause fainting due to a sudden drop in blood pressure. Narrowing of the airways can also occur at the same time, with or without the drop in blood pressure. This can cause breathing difficulties and wheezing.

Other symptoms:

- Swollen eyes, lips, genitals, hands, feet and other areas (this is called angioedema)
- Itching
- Sore, red, itchy eyes
- Changes in heart rate
- A sudden feeling of extreme anxiety or apprehension
- Itchy skin or nettle-rash (hives)
- Unconsciousness due to very low blood pressure
- Abdominal cramps, vomiting or diarrhoea, or nausea and fever.

Anaphylaxis varies in severity. Sometimes it causes only mild itchiness and swelling, but in some people it can cause sudden death. If symptoms start soon after contact with the allergen and rapidly worsens, this indicates that the reaction is more severe
